

# Beyond Crisis

*Achieving organisational renewal in turbulent times  
- creating purposeful self-renewing organisations*

A facilitated workshop on  
9<sup>th</sup> February 2010, 13:00 – 18:30  
University of Westminster, London

*The next decade will present organisational challenges on an unprecedented scale*

*There will be no return to business as usual*

Beyond Crisis is a facilitated workshop that introduces new organisational development principles, and practical tools, designed to work in any type of organisation, that will extend your capabilities and renew your thinking.

It maps out a process for creating resilient organisations based on a clear set of values and principles. It takes into account the recent crisis and upheaval caused by debt, demographics, technology and new ways of thinking and behaving.

These principles and tools are based on extensive research and experience of consultants from SAMI Consulting.

**Participants will:**

- *learn how to build a 'purposeful self-renewing organisation' to survive and succeed in the midst of chaos*
- *explore a range of tools and future scenarios for diagnosing problems and creating solutions*
- *explore how to apply these techniques in their own organisation.*
